

Appointment Scheduling

ChartMaker® Go includes an integrated Appointment Scheduling System. You have the ability to schedule appointments separately for all your providers and practices, for years in advance! The system gives the office staff tremendous flexibility in specifying not only when, but also how appointments are scheduled. The office calendar screen gives the operator an at-a-glance indication of how busy each day is. Color can be used to indicate the type of appointment scheduled.

The system also checks pre-certification authorization, surgical follow-up days and tracks missed or canceled appointments in the patient's inquire file.

Electronic Eligibility Checking

ChartMaker® Go can quickly verify patient eligibility directly from our Appointment System or on a per-patient basis.

Automatic Patient Reminder Option

ChartMaker® Go has an optional module to automate your appointment and recall reminders. The Automatic Patient Reminder Module will automatically dial and remind your patients about their up-coming appointments and recalls on a cost-per-call basis.
