STI ChartMaker® Go

Electronic Insurance Claims

ChartMaker[®] Go sends insurance claims electronically to Medicare, Medicaid and most commercial carriers for professional, facility, ambulance and anesthesia via Change Healthcare. There is a charge for Electronic Data Interchange (EDI) of \$59/month per billing provider for these services.

First, electronically submitted claims are scrubbed for errors by ChartMaker[®] Go's Practice Manager. They are not keypunched or manually reviewed at the insurance carrier and, therefore, less likely to be rejected. Studies show that practices that bill electronically experience 21% fewer rejections. ¹

Second, within 24-48 hours you will be electronically notified that the submitted claims have been accepted or

rejected. If rejected they can be corrected and resubmitted the same day.

Third, electronically submitted claims are typically paid faster. "By law, Medicare must pay an electronic claim in 14 days. The same paper claim wouldn't be paid until day 26." *

Fourth, electronically submitted claims are automatically tracked with ChartMaker[®] Practice Manager. If a claim is not paid within the agreed to time, a report can be generated, the carrier contacted and the charge reviewed, and ChartMaker[®] Practice Manager can automatically resubmit the claim.
